## Stoves - proud to be British

Stoves is part of the only major kitchen appliance company still committed to manufacturing all cooking categories in the UK. We know exactly what the British cook expects from their appliances and tailor our products accordingly.

Designed and hand crafted by our dedicated product teams right here in the UK, this stunning collection is the pinnacle of British quality and excellence, and has the features to match. Like open door grilling – found on the majority of our products allowing air to circulate around the grill so food grills rather than bakes. Then there are our multifunction ovens that are equipped with all the features a British cook could ever desire.

Stoves offers a full range of appliances and accessories all developed with a painstaking attention to detail to complement our range of cookers and hobs. Our factory is purposely split into small teams who work solely on just one product, carefully assembling each and every one from the ground up, by hand. That's not just quality, that's Stoves quality.

When it comes to being completely confident in our products, there's no one more so than Stoves. That's why across our collections we offer a fantastic one year labour and five year parts warranty. And, the fact that we employ over 1000 staff in the UK really makes a statement about our commitment to offering our customers the best possible services via:

### A UK manufacturing site

We're proud to manufacture in Britain and employ staff with the experience required to make exceptional products. The products within this brochure that are Made in Britain are marked with a Union tick.

### A UK distribution centre

We've invested millions of pounds into the development of our distribution centre to ensure that our products arrive safely and on time, every time.

### UK award-winning customer support

Four times winner of Domestic & General's 'Total Excellence' Award, our UK call centre has dedicated advisers ready to answer any questions you may have. Simply call 0844 248 4147 to speak to an adviser who will be happy to answer any queries you may have.

### Best of British

As you can see, Stoves are immensely proud to be British, so much so, we challenged the UK's top students to design a new Made in Britain logo. The winning logo (left), as chosen by industry experts, is by Nottingham University student Cynthia Lee. With National press exposure and industry backing, we hope that this logo will one day be used as the industry standard.

## Stoves - teaming up with the best!

Here at Stoves we're always on the lookout for perfect partnerships with people or organisations that share our values. Whether it's working with world-renowned chefs to develop and improve our products, lending a helping hand and our experience to charitable organisations, or entering initiatives that promote greener living, we're proud to join forces with the best.

### Brian Turner

We are delighted to have top chef Brian Turner as our brand ambassador. Brian's unrivalled pedigree as a classically trained chef and TV personality makes him ideal for Stoves.

Brian has been actively involved in product design and has made a number of public appearances and cooking demonstrations in support of our products and British manufacturing.

### The Women's Institute – Denman College

In an attempt to keep Britain cooking, Stoves has teamed up with the largest women's organisation in the UK – The Women's Institute. The marriage of two great British brands, both with a keen hand in cooking, seems a harmonious match.

Working on a wide range of projects together, our aim is to get people into the kitchen and cooking again.

### Queens Award – selling British product overseas.

In 2012 we were proud recipients of the Queen's Award for Enterprise for the success of our products overseas. The awards are the most prestigious accolades for business performance and recognise and reward outstanding achievement.

# Fuel types

## Dual fuel

Offering the flexibility of a gas hob and an electric oven, this fuel option allows you to benefit from the controllability of a gas hob and the temperature distribution of an electric oven.

## Gas

This fuel type gives you maximum cooking control. The heat change is immediate and precise.

## Electric

This fuel option achieves perfect results every time, thanks to even temperature distribution.

## Induction

Induction technology works by heating the pan rather than the hob, offering a smarter, faster, safer and greener way to cook. Products with induction technology are highlighted throughout the brochure with the icon above, see pages 8-9 for further information.

# Grills

## Gas grill

A gas fuelled grill is a standard feature on many gas appliances.

## Electric grill

Grilling can often be adjusted by selecting a higher or lower shelf or trivet position.

## Electric variable grill

Grilling temperature can be altered by selecting a high or low setting.

## Dual circuit grill

This gives you a feature you'll find on electric and dual fuel cookers. It gives you the ability to use either the full or half width grill, dependant on your requirements. There's an economy setting for smaller amounts and a full grill setting for larger quantities.

## Dual circuit variable electric grill

Your grilling temperature can be altered by selecting a high or low setting. It also gives you the ability to use either half or the full width of the grill depending on your requirements.

# Ovens

## Electric fanned oven

An oven that distributes heat evenly through the use of an integrated fan.

## Electric multifunction oven

An oven that incorporates up to 9 functions including fan, intensive bake, conventional, browning element, defrost, pizza setting, a top and base heat and fanned grilling.

## Electric conventional oven

An oven that uses heat from the elements at the top and base of the oven. Heat rises, so the oven is cooler at the bottom and hotter at the top.

## Gas conventional oven

An oven that uses heat from gas jets at the base of the oven. Heat rises, so the oven is cooler at the bottom and hotter at the top.

## Fanned defrost

A function where the oven fan assists defrosting by circulating air around the food.

## Tall fanned oven

For even, multi-level cooking with a huge 91 litre capacity oven. Suitable when cooking on several shelves at once as heat is produced evenly throughout the oven.

# Features

## Easy clean interior

A specially designed enamel that resists cooked on food and spills for ease of cleaning.

## Telescopic sliders

Intelligently designed shelves that allow easy access to food inside the oven.

## Halogen flood light

Used to illuminate the oven interior so you can see clearly through the viewing window without having to open the oven door. Halogen is a superior choice for ovens as it provides up to 36% more light but using over 20% less energy than a standard bulb.

## Energy rating

Relates to the efficiency of the specific appliance, A-energy is the most efficient energy rating with AA-energy rating being this rating in both the top and main cavity of a double oven.

## Flame safety device

For added safety, this device is designed to detect if the flame goes out on your appliance and will cut off the gas supply immediately.

## Made in Britain

Stoves is part of a company that is still committed to manufacturing cookers in this country. Look out for the Union tick throughout this brochure denoting which products are made right here in the UK.

## Colour Boutique

A selection of eight range cookers available in 12 stunning colours.

## Wok burner

An extra large burner offering the benefit of intensive heat.

## Warming zone

A low-heat setting for keeping food at constant temperature.

## Minute minder

An integrated timer.

## Fully programmable clock & timer

A 24-hour digital clock that you can programme to come on and go off so your dinner can be ready when you get back from work.

## 'Cook to off' programmable clock & timer

A programmable 24-hour digital clock that you program to go off at the required time.

## Hob hot indicators

For safety, a light that stays illuminated indicating that the hob is hot to touch.

## Slow cook function

A function that allows you to cook food for a long time, perfect for tenderising meat.

## Open door grilling

Leaving the door open whilst grilling means the air inside the grill circulates, therefore grills rather than bakes.

## 32A compliance

Works on a standard 32amp power supply.

## Red spot element

Sealed electric hob elements that heat up quicker than standard elements.

## Bevelled edges

A design feature that offers a more modern and contemporary finish to the edge of the glass around our ceramic hobs.

## Flush fitting

An appliance that is designed to align perfectly with existing worktops and units.

## Flavours *Flavours...*

A collection of coloured Freestanding cookers. With an eclectic array of colours to choose from including Jalapeño, Aubergine, Sushi, Papaya and Coconut - just add to taste!

## A guide to induction – the future of cooking

Here at Stoves, we pride ourselves on being at the forefront of innovation and technology. That's why, in a number of our products you'll find induction technology – a unique new way of cooking that uses no direct heat source.

Without getting too technical, induction is like having an individual heating element embedded in the base of each pan. When the pan is placed on an induction hob it completes a magnetic circuit below the hob's surface. This circuit creates energy within the base of the pan which, in turn, heats the pan and its contents. What's more, because the heat is generated inside the pan, using a pan smaller than the hob's surface will not waste any energy.

**1** Ceramic hobs use more energy by heating the entire ring even if a pan is only covering half the surface (see Fig.1).

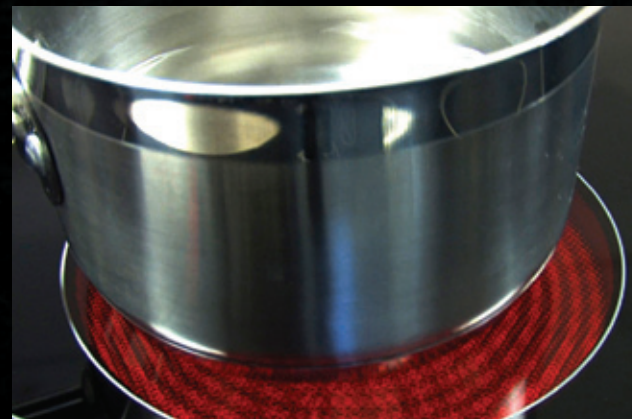

Fig.1: Standard ceramic hobs use more energy.

**1** Induction hobs heat the pan not the surface of the hob, so no energy is ever wasted (see Fig.2). As you can see the ice cube on the unused section of the hob doesn't melt even when the hob is in use.

Fig.2: Induction technology only heats the pan.

**1** Induction cooking gives you outstanding low-heat performance and increased control. Melting chocolate without it sticking to the pan becomes simple. Induction hobs create no direct heat so controlling the temperature is simple and instantaneous.

**1** Induction hobs can boil water considerably faster than a ceramic hob and twice as fast as a gas hob (see Fig.3).

Fig.3: Induction hobs boil faster than ceramic and gas hobs.

**1** Induction hobs work with any pan that has iron in its base.

So, in a nutshell, that's the Stoves guide to induction technology. It's an exciting and fast-moving technology, but you can be sure that wherever induction takes us, Stoves will be leading the revolution.

## How induction can be a revelation in your kitchen

With its helpful, intuitive technology, fast heat-up times, added safety and increased energy efficiency, cooking with Stoves induction means you can achieve perfect results every time.

### Smarter

Intuitive technology that helps you achieve perfect results

- Pause function. This allows you to shutdown and re-start the product at the touch of a button.
- Recall function. This automatically saves your last temperature setting in the hob's intelligent management system.
- Automatic switch off. This allows you to pre-programme each of the hob's cookzones to turn off whenever you wish.
- Griddle\* zone. This allows you to pair two of the cooking elements to create one large cooking zone.
- Minute minder. A timer and alarm system that tells you when your selected time has elapsed.
- Keep warm. Delivers constant low temperature, perfect for melting chocolate and delicate sauces.

### Safer

Added peace of mind

- Safety shutdown function. If left unattended for a long period, all cookzones on the hob are turned off safely.
- Child lock. Disables all of the hob's controls for added safety.
- Pan overheat sensor. If left unattended, the hob automatically shuts down before a dangerous temperature is reached.
- Pan detection function. This means the hob will not function until a suitable pan is placed on the ring.

### Faster

Reaches the required temperature faster

- Induction technology. Nearly twice as fast as a gas hob and 30% faster than a ceramic hob.
- The hob's automatic heat up function will initially heat up to its highest temperature before dropping to the selected setting. This really speeds up the heating process, ideal for cooking pasta.
- Power boost. Draws additional power when required, perfect for wok cooking.

### Greener

The most energy efficient way to cook

- Induction technology. Approximately 30% more efficient than a gas hob and 25% more than a ceramic hob.
- Ceramic finish. This is easy to wipe-clean, meaning that spillages don't burn onto the surface.

\*Not all features are available on all our induction models, see individual products for full specifications.

### Everything you could ever need for your kitchen, built-in.

Introducing the Stoves Built-in collection, bringing you total flexibility in a stylish package. Designed and built in the UK, this series of mini ovens and hobs boasts all the quality you have come to expect from a Stoves appliance.

Over the next few pages you'll see each of our Built-in products, both gas and electric, in all their glory – including our new Sterling collection with stunningly sleek designs. What's more all our ovens work on a 32amp supply, are A/A+ energy rated and feature halogen flood lights.

And for a beautifully co-ordinated kitchen why not take a look at our induction hobs, dishwashers, washing machines, fridges and wine coolers. Offering all the attention to detail and excellence that comes from being hand built by dedicated product teams right here in Britain, they are the perfect complement to the collection.

INTRODUCING THE PROFESSIONAL RANGE

A sleek and stylish collection of multifunction ovens, the new Professional range is packed with innovative features.

Both gas and electric ovens have large clear digital displays with electronic touch control and twist and go dials. The gas version delivers total temperature control in both gas mark and centigrade and is the only gas multifunction oven on the market. It offers three main functions: a rapid heat setting that shortens pre-heat by 50%, a grill for browning and a base heat ‘pizza’ setting.

Continuing our commitment to innovation and great British design, the Professional range will delight even the most discerning British cook.

- Programmable multifunction oven
- Electronic touch control
- Telescopic sliders
- Soft start light when oven switched on
- Flashing light until desired temperature is reached
- Accurate and repeatable temperature
- Rapid pre-heat reduces heating time by 50%

Stoves Range collection. The pinnacle of cooking. The height of sophistication.

Whether your sense of style is classic or contemporary there's a Stoves Range cooker to suit all tastes. Our classically designed Richmond range is available in three different sizes and 14 stunning finishes so you can really make a statement in the kitchen.

On the other hand, if you're more sleek than traditional, our stylish Sterling collection will be just what you're looking for. Available in a choice of sizes and colours the Sterling features gorgeous styling, sleek lines and a whole host of fantastic features. It truly is the perfect centrepiece to any kitchen.

**COLOUR**  
**Boutique®**  
**POUR ON YOUR STYLE**

8 range cookers. 12 stunning colours.  
Endless possibilities.

If you're someone who just can't help but express yourself in the kitchen, flaunting your flair for food for the whole world to see, then you're going to love Colour Boutique.

No longer is causing a stir confined to your stroganoff, or creating a frenzy just for your fajitas. Now you can make a real splash in the kitchen with a custom coloured range cooker, made to order, from Stoves.

Simply choose one of the gorgeous designs from the Richmond range collection and then personalise it with one of 12 eye-popping colours. There are four delicious colour schemes - **Fresh Spring**, **Summer Splash**, **Autumn Chic** and **Urban Winter** - each with three delectable colours to choose from.

For more information about Colour Boutique products, please visit [stoves.co.uk](http://stoves.co.uk)

The Richmond range features DFT (dual fuel), Ei (electric with induction hotplate) and GT(gas) models, which are all available in our 12 stunning colours.

Stainless Steel 444440083

Innovation designed to make a statement.

#### Hoods & Splashbacks

Cooker hoods are an essential item in the modern kitchen, especially with the growth in open-plan living. Filtering grease and cooking odours from the kitchen environment, cooker hoods also illuminate the cooking area for easier viewing when cooking on the hob. Each of our sleek, modern designs perfectly complement our range of cookers and hobs.

We also offer durable stainless steel and stylish black splashbacks in various sizes to suit your kitchen and appliances.

#### Cooling & Dishwashing – Fridge Freezers & Dishwashers

Of course, the first benefit of integrated appliances is that they are hidden away to help keep your kitchen uniform. All the more reason, we feel, to channel extra effort into internal design and durability. Every one of our integrated appliances offers the same high functionality as our cookers and is made to the same quality standards. From easy-clean fridges rated 'A+' for energy efficiency across the board to our superb slimline integrated dishwasher, we've gone to great lengths to help make your decision easy.

Whether you have chosen the classic design of the Richmond collection or the sleek lines of our stylish Sterling collection these chimney hoods are the perfect complement to a Stoves cooker.

## Brian Turner's recipes

All recipes taken from Great British Grub by Brian Turner

### Pear and Walnut Salad - Serves 4

#### INGREDIENTS

- 4oz baby rocket leaves
- 2 pears
- 3oz walnut pieces
- 2tbsp walnut oil
- 2tbsp ground nut oil
- Juice of ½ lemon
- Salt & pepper

#### Optional:

2oz Yorkshire blue cheese (Roquefort)

#### METHOD

Pick rocket leaves and put into a bowl. Chop the walnut pieces and mix with oils and lemon juice. Cut the pear in half lengthwise and remove the stem and pips. Cut into thin slices and add to the dressing and nuts. Season with salt and pepper. When ready to serve throw in the leaves. Toss carefully and put into individual service plates. If cheese is needed just crumble over.

### Braised Duck with Peas - Serves 4

#### INGREDIENTS

- 2 x 2 ½ lb ducks
- 3oz butter
- 8oz bacon piece
- 6oz small button onions (12+)
- 1pt duck stock
- 1tbsp chopped sage
- 1tbsp chopped mint
- 1tbsp chopped parsley
- 1lb frozen peas
- 1 head of lettuce (round)
- Salt & pepper

#### METHOD

Put the giblets into the stock and leave to gently simmer for 30 minutes. Cut the bacon into thick lardons i.e. ¼" x ¼".

Melt 1oz butter and add the lardons. Add the button onions and gently colour. Along with the lardons.

When nicely coloured take out and keep on one side. Prick the ducks all over and rub with a little salt. Colour in the same pan as the lardons and onions and take out of pan.

Drain off all fat and put ducks back in the pan. Strain the stock into the pan. Bring to the boil and cover with a lid on. Put in oven 160°C and cook for 1 hour. Add the button onions and lardons and braise for a further 15 minutes. Take the ducks out and allow to rest, keep warm. Remove excess fat. Shred the lettuce into strips add the sauce with the peas and the herbs. Reduce this sauce by 1/3 and correct seasoning and consistency. Monte au beurre with 2oz butter. Carve the ducks and put on a plate. Pour sauce over and serve.

### Salad of Scallops with Bacon - Serves 4

The combination of scallops and bacon crops up in Scottish, English and Manx cooking, one of those wonderful anomalies of flavour balance, which is similar to oysters and bacon and the Welsh trout cooked with bacon. I've taken it a little into the present time by presenting it in a salad.

Scallops are one of our most delicious shellfish, native to the cold waters of western Scotland and around the Isle of Man (where there has apparently been a scallop fishery for some 3,000 years). Giant or king scallops are the largest, the queens or queenies being much smaller (and, if used instead, you will need six to seven - or even more - instead of three per person).

#### INGREDIENTS

- 12 large scallops
- 5tbsp olive oil
- Salt and freshly ground black pepper
- 6 rashers smoked back bacon
- 6 spring onions, chopped
- 1tbsp grain mustard
- 2tbsp white wine vinegar
- 2tbsp groundnut oil
- 1tbsp each of chopped fresh parsley, chives and chervil.

Mixed salad leaves (more or less, depending on whether for a starter or main course).

#### METHOD

Trim the scallops using the white meat only for this dish. Heat 1 tbsp of the olive oil in a solid flat-bottomed frying pan, and sear the scallops until golden brown, a minute or two only. Turn over just to sear, season and then take out and keep warm.

Meanwhile trim the bacon and cut into thin strips. Sauté and colour these in the frying pan that the scallops were cooked in.

Add the chopped spring onion, and sauté until coloured, and then put both bacon and onion into a large bowl.

Mix the mustard and vinegar well in a bowl or jar, then add the remaining olive oil, the groundnut oil, herbs and some seasoning. Take some of the dressing and toss with the salad leaves then lay these in the middle of four plates. Add the remaining dressing to the bacon and onion. Balance the three scallops per person on each mound of salad leaves, and then spoon the bacon, onion and dressing over and around.

### Chunky Tomato Soup - Serves 4

Soup is one of the most traditional of dishes on the British culinary scene, and local 'pot' vegetables were used in the beginning, perhaps with a little grain or, when they were lucky, some meat.

When tomatoes gradually came to be accepted, some two centuries or so after they had been introduced from the New World, they were pounded to make soups or acid sauces or ketchups. Apparently it wasn't until the twentieth century that we were brave enough to eat these scarlet imports raw!

#### INGREDIENTS

- 2 oz unsalted butter
- 4 oz each of carrots, peeled onion and celery, finely chopped
- 2 garlic cloves, peeled and finely chopped
- 1 1/2 lb tomatoes
- Roughly chopped basil stalks
- A handful of parsley stalks
- 1tbsp fresh chopped thyme
- A pinch of unrefined caster sugar
- Salt and freshly ground black pepper
- 2 pints chicken stock
- 5 fl oz single cream

#### Garnish:

10 tomatoes, skinned and seeded (use the skins and seeds in the soup, so do this first) a splash of olive oil, a bunch of fresh basil, chopped (use the stalks in the soup) 1 garlic clove, peeled and chopped.

#### METHOD

Melt the butter in a large pan, and sweat the finely chopped carrot, onion and celery together. Do not colour.

After 3 minutes, add the garlic, the skins and seeds of the garnish tomatoes, and the chopped tomatoes, along with the

basil stalks, parsley stalks, thyme, sugar and some salt and pepper to taste.

Stew gently for about 10 minutes. When almost all of the liquid has disappeared, add the chicken stock, and cook gently for 20 minutes. Pass the soup and vegetables through a sieve.

Put back into a clean pan and bring back to the boil. Add the cream and check the seasoning. Chop the skinned garnish tomatoes into neat dice. Warm them in the splash of oil with the basil and garlic. Pour into the soup, and serve.

## Visit the WI cookery school at Denman

Stoves has joined forces with the Women's Institute to get people back into the kitchen and cooking again. All courses in the Denman school are taught using Stoves appliances.

Set in the picturesque village of Marcham, near Oxford, the WI Cookery School at Denman offers you the chance to learn new skills and expand your horizons on a wide variety of cookery courses from Better Baking and Low Calorie Cooking to Knife Skills and Stunning Afternoon Teas.

Whether you choose a day visit or a residential course, the unique atmosphere, tradition and environs of Denman, with its combination of comprehensive facilities, fine dining and tranquil setting make for a time out you'll treasure, and want to re-live, for years to come.

Courses include: Gamekeeper's Larder, World Street Food, Modern Vegetarian, French Country Cooking, South East Asian Adventure, Indian Festival and many, many more.

### Cookery Courses

Available from September 2012 – August 2013.

For a full list of courses, dates and prices, please visit [www.stoves.co.uk](http://www.stoves.co.uk)

For more information on the course details and the WI, please contact us:

## Home delivery

We are delighted to be able to offer you our new and improved home delivery services that are available as an optional extra when you buy your Stoves appliance.

We know how important it is to make sure that every step of your appliance purchase is just perfect so we've developed a service that fits the bill:

- We offer fast delivery times and can deliver to anywhere within the UK, 6 days a week
- We will position and install the appliance in your room of choice
- We offer a service to dispose of your old appliance
- Our team of expert installers will test everything to make sure it's in perfect working order.

For more information about this service, please speak to your retailer when you buy your Stoves appliance.

Order Day 1 for delivery Day 3. Delivery available to the UK to most postcodes 6 days a week.

Delivery and installation is available Monday to Friday. Delivery is available to the whole of the UK, followed up with installation by our fleet of national engineers.

Our all-in-one service that includes it all. Delivery, disconnection, installation and removal all in one convenient visit on a choice of days. UK mainland only.

Glen Dimplex Home Appliances operate a continual product improvement policy. Therefore we reserve the right to change the specifications for any product without notice. All dimensions are approximate. This brochure should not replace the installation manual that gives more detailed information. All cooking appliances featured within the brochure are CE marked as complying with the relevant appliance directives, produced under surveillance to BS EN ISO9000 series. Appliances can become very hot and retain their heat for a long period of time after use. Children should be supervised at all times and should not be allowed to touch the hot surfaces or be in the vicinity when in use or until the appliance has cooled. All technical data is taken under laboratory conditions and may vary in use. Ratings are quoted at 230V (also suitable for 220V and 240V). The statutory rights of the consumer are not affected. Induction hob: the functions of the hob comply with applicable standards on electro-magnetic interference. Your induction cooking hob thus complies fully with the statutory requirements (Directive 89/336/EEC). Every reasonable care has been taken to ensure that descriptions in brochures are accurate. However, specifications may change without prior notice. Please contact customer services before ordering. All electrical appliances must be installed by a qualified electrician using suitable electrical connections.
